

Q.T.S

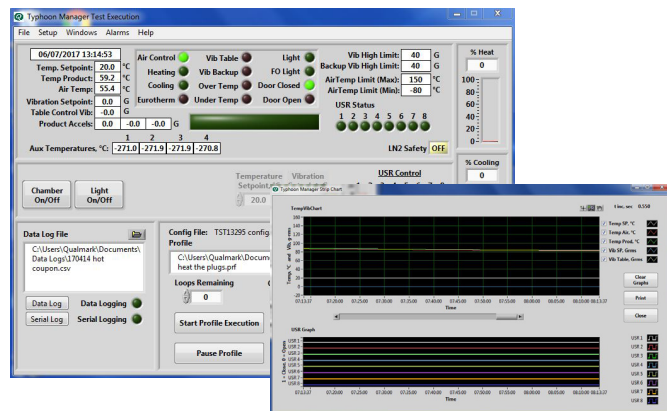

Qnergy Testing Services - A Qnergy Company

QTS will provide your product team with Highly Accelerated Life Testing (HALT) services. QTS has the staff, testing equipment, and machine shop support to exercise your test articles within a controlled thermal and vibration environment. QTS utilizes a QQualmark HALT chamber (shown in the images and described below). Accelerated life testing will help you quickly find the weakest link within your products.

EQUIPMENT SPECIFICATIONS

- Qualmark OVS-2.5
- Chamber Size: 35" L x 36" W x 36" H
- Chamber Volume: 26.25 cu.ft.
- Temperature Limits: -148°F to 392°F
- Rate of Temperature Change: 140°F/min
- Table Dimensions: 30" x 30"
- Table Max Capacity: 320 lbs.
- Max Vibration Setpoint: 30g-pk (bare table)
